

StratosFuel

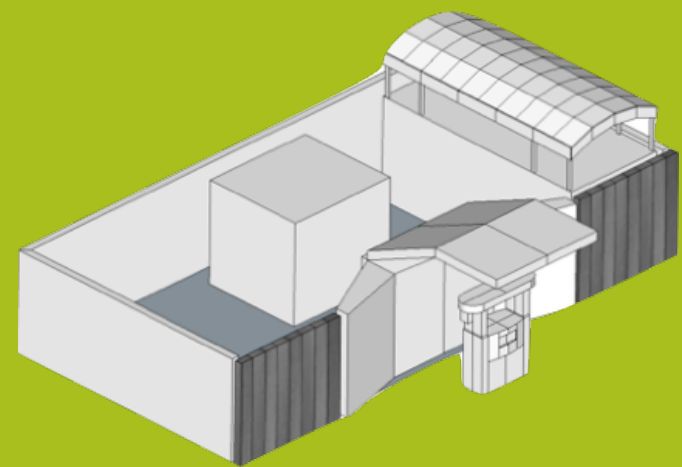

CHBC Hydrogen & Fuel Cells in Ports and Shipping

Workshop

Port of LA

Jonathan Palacios-Avila

Opportunities: Infrastructure

01.

Development

Construction and operational services for H2 Stations.

02.

Renewable H2 Supply

Produces and retail hydrogen for fuel cell applications at the ports

03.

Hydrogen Stations

Stationary and mobile station applications

04.

Heavy-Duty Vehicles

The port has a need for heavy-duty FC vehicles.

Opportunities: **Examples**

Top Loader Vehicles

StratosFuel has been selected to supply fuel and a mobile refiling station to top loader vehicles at the Port of Los Angeles.

Barriers:

01 Market Entry

The incumbent technology has a strong foothold on port operators

02 Infrastructure Subsidies

More funds and incentives need to be offered in order to increase H2 refueling infrastructure at the ports

03 Equal Funding Opportunities

Equal funding incentives for fuel cell vehicles need to be offered
